Agricultural Cooperative Service

ACS Service Report Number 17 Farmer Cooperative Statistics, 1985

ABSTRACT

FARMER COOPERATIVE STATISTICS, 1985 by Ralph M. Richardson, Celestine C. Adams, Katherine C. DeVille, Beverly L. Rotan, and John W. Stutzman, Cooperative Management Division, Agricultural Cooperative Service, U.S. Department of Agriculture, Washington, D.C. 20250, ACS Service Report 17, December 1986.

A survey of U.S. farmer cooperatives for calendar year 1985 showed a drop in business volume and a continuing decline in number of organizations and memberships. Gross business and net business volume are reported for 5,625 cooperatives. Business volume, number of cooperatives, and cooperative memberships are reported by commodity and State for those cooperatives classified as marketing, farm supply, and related service. Cooperative growth trends show changes in cooperative members, business size, sales volume, and share of marketing and purchasing activity. Data on balance sheet and net margins and selected activities of other service organizations are presented.

Key words: cooperatives, statistics, business volume, memberships, balance sheet, net margins.

ACS Service Report 17, December 1986.

PREFACE

Farmer cooperative statistics are collected annually to provide information on the progress and trends in cooperatives' growth and development. Many people use these statistics for various purposes such as research, technical assistance, education, planning, and public policy. Acquiring, analyzing, and disseminating farmer cooperative statistics are authorized by the Cooperative Marketing Act of 1926.

This report provides detailed information on the number, membership, and business volume of farmer cooperatives classified by commodity, State, and functional type. Both gross (includes intercooperative business) and net (excludes intercooperative business) dollar volumes of cooperatives are shown.

Basic information is provided on the balance sheet and net margins of farmer cooperatives by principal product marketed and major functional type.

Data are collected from individual farmer cooperatives by mail survey of organizations identified by Agricultural Cooperative Service (ACS), as meeting the requirements of the ACS definition of a farmer cooperative.

A combination of census and sampling procedures are employed to reduce the work of collecting and assembling data, to reduce respondent burden, and to enable more timely publishing of statistics.

A full census of all farmer cooperatives is conducted every 4 years. Stratified random samples are used in the alternate years. The 1985 survey is a sample enumeration.

ACS depends on the cooperative community's response to its annual survey to develop a detailed and comprehensive set of statistics on farmer cooperatives. The time and effort taken to provide information and the rapidity with which it is furnished are greatly appreciated.

HIGHLIGHTS

The 1985 survey of marketing, farm supply, and related service cooperatives showed a decline in business volume and number of memberships and organizations as well as a decrease in net margins.

Total gross business volume (including intercooperative business) handled by cooperatives amounted to \$85.1 billion, down 12.2 percent from \$96.9 billion in 1984.

Total net business, excluding business done between cooperatives, amounted to \$65.6 billion, down 10.2 percent from the \$73 billion in 1984.

The total number of cooperatives dropped from 5,782 to 5,625, a net decrease of 157 associations. Each year, new cooperatives are formed and others disappear as they go out of business due to consolidation, merger, acquisition, or unsuccessful operations.

Cooperative memberships of 4,841,749 dropped to 4,781,216 in 1985, a decrease of 1.3 percent.

The gross value of farm products marketed by cooperatives amounted to \$57 billion, a decrease of 15.7 percent from \$67.6 billion. The net value of these farm products, after eliminating duplication resulting from intercooperative business, amounted to \$47.3 billion, a 13.3-percent decrease from \$54.6 billion.

The gross value of farm supplies handled by farmer cooperatives amounted to \$26.4 billion, decreasing 4.7 percent from \$27.7 billion in 1984. The net value of these supplies, after intercooperative business was eliminated, amounted to \$16.6 billion, down 1.9 percent from \$17 billion.

Receipts for services related to marketing farm products and handling farm supplies amounted to \$1.6 billion, an increase of 7.8 percent from \$1.5 billion.

Combined assets for all farmer cooperatives totaled \$27.8 billion, down 4.8 percent from the \$29.2 billion for 1984. Net assets, after eliminating intercooperative investments, were \$24.5 billion in 1985, compared with \$26.2 billion in 1984, a 6.5-percent decrease.

Total liabilities were \$15.7 billion in 1985, down 7.5 percent from \$17 billion reported in 1984.

Net worth, or member and patron equity, decreased nearly 1.1 percent from \$12.2 to \$12.1 billion. Member and patron equity financed 43.4 percent of total assets, up from 41.7 percent.

Farmer cooperatives' net margins were more than \$775 million, a 23.1-percent decrease from the \$1.01 billion in 1984. The \$775 million included intercooperative dividends and refunds of \$210 million--up 13.2 percent from \$185 million in 1984.

Iowa was the leading State in combined marketing, farm supply, and related service volume, with more than \$5.9 billion, representing 9 percent of total net business volume. California ranked second with \$5.8 billion, 8.8 percent of total and Minnesota ranked third with more than \$5.4 billion, 8.3 percent of the total.

Minnesota had the most cooperatives with 566, North Dakota was second with 391, and Texas followed closely with 387.

I--DEFINITION OF A FARMER COOPERATIVE

For inclusion in the annual survey, a cooperative is defined as one that meets the following requirements:

(1) Farmers or agricultural producers hold the controlling interest in the cooperative; (2) no member of the cooperative is allowed more than one vote because of the amount of stock or membership capital owned, or the cooperative does not pay dividends on stock or membership capital in excess of 8 percent a year, or the legal rate in the State, whichever is higher; and (3) the cooperative does not deal in products of nonmembers in an amount greater in value than it handles for its members.

This definition may result in showing a larger or smaller number of farmer cooperatives than found in lists or directories of State agencies or cooperative councils. Agricultural Cooperative Service (ACS) includes only marketing, farm supply, and related service cooperatives on its list. Livestock shipping associations and wool pools are included as marketing cooperatives. Many State lists include other types of cooperatives such as production, credit, telephone, electric, and consumer cooperatives as well as those that do not fulfill ACS's definition. Another reason for differences in the count or number of cooperatives is that cooperatives may operate in a specific State for a considerable period of time before they are included in the national survey. This may be due to one of the following reasons: (1) ACS may not learn of the existence of the cooperative immediately; (2) the cooperative may not have completed and returned the initial questionnaire; or (3) no notification is received of a cooperative that quits operating.

Readers who wish to make comparisons from year to year in specific commodity groups, therefore, should keep in mind the differences in lists and classifications in State and Federal data.

Classification of Cooperatives

Statistics are presented according to a cooperative's major function or classification, such as marketing, farm supply, and related service. These classifications are defined as follows:

Marketing cooperatives are associations whose primary business is marketing farm products for members—that is, more than 50 percent of total dollar volume was derived from the sale of members' farm products. Marketing cooperatives are further classified according to which major commodity of 13 classifications is predominant (in terms of dollar volume) in each association's business. If a cooperative consistently indicates it is handling a larger volume of a commodity than the one it was originally organized to handle, and which provided the basis for its initial classification, it is reclassified by the commodity currently representing the predominant product in its business volume.

Cooperatives first furnished data by individual commodities handled and services performed in the 1950-51 survey. 1/ Cooperatives operating on a multistate basis were asked to furnish information on memberships and business volumes for the individual States they served. Before that time, all memberships and business were credited to the States in which each association maintained its headquarters.

^{1/} A detailed discussion of the revisions initiated in statistical methods in 1950-51 was given in Statistics of Farmers' Marketing, Purchasing, and Service Cooperatives, 1950-51, U.S. Dept. Agri., Farm Credit Admin., Misc. Rpt. 169, pp. 1-3.

Farm supply cooperatives are those whose farm supply business accounted for more than 50 percent of total dollar volume.

Farm supply cooperatives include those handling all types of farm production supplies and equipment such as feed, seed, fertilizer, petroleum products, farmstead equipment, and building supplies. Some also handle farm and home items such as heating oil, lawn and garden equipment, and food.

Major functions of <u>related service</u> cooperatives are trucking, storing, drying, artificial insemination, or similar services related to marketing or farm supply activities.

Many cooperatives handle more than one commodity and provide both marketing and farm supply facilities, as well as facilities and equipment to perform related services such as storing, drying, and trucking. These associations are classified according to the predominant commodity or function as indicated by their business volumes.

Additional data on the number, participation, and activity of other types of service cooperatives or organizations, such as rural electric cooperatives, production credit associations, rural credit unions, and dairy herd improvement associations, are summarized.

Organizational Structures

Centralized

Most farmer cooperatives are centralized organizations. Individual farmers make up the membership. These 5,444 centralized cooperatives usually serve a local area or community, county, or several counties. Most local associations usually perform a limited number of the first steps of marketing. In farm supply associations, practically all sales are at the retail level. A few centralized cooperatives operate over large geographic areas and have members in several States. They often provide more vertically integrated services such as processing farm products or manufacturing feed and fertilizer.

Bargaining associations usually have centralized organizational structures. These associations derive all or a major portion of business volume from negotiating with distributors, processors, and other buyers and sellers over price, quantities, grade, terms of sale, and other factors involved in marketing farm products; only a few bargain for the purchase of farm supplies. While the primary function of such an association is to bring buyers and sellers together to contract for the sale of members' products, many bargaining associations now perform additional functions. For example, dairy bargaining associations at one time generally performed only price negotiation. Now, many perform additional functions, such as physically handling a portion of the milk and making spot sales for their patrons. Bargaining associations, like other dairy marketing cooperatives, represent their members at Federal or State milk marketing order hearings.

Federated

Federated cooperatives comprise two or more member associations organized to market farm products, purchase production supplies, or perform bargaining functions.

Member associations often operate at points quite distant from federation headquarters. One hundred and eight federated cooperatives have been identified. Individual farmers are not members of strictly federated associations; rather, they

are members of cooperatives that comprise the federation--sometimes called a regional cooperative. Also, some federations are made up of regional cooperatives--often called interregional associations.

Mixed

A small number of cooperatives have both individual farmer-members and autonomous cooperative members. Therefore, these associations are a combination of both the centralized and federated structures. Often, these cooperatives serve large geographic areas with members in many States and provide a variety of integrated services. Seventy-three cooperatives have been identified as having a "mixed" structure.

II--COOPERATIVE GROWTH TRENDS

As cooperatives declined in number, they grew in size and increased their importance as purchasers of supplies and marketers of products for members. Business volume of farmer cooperatives increased more than $1\ 1/2$ times (with some fluctuation in the early 1980's) in the decade between fiscal year 1976 and calendar year 1985.

Number of Organizations

The total number of marketing, farm supply, and related service cooperatives declined from 7,535 in 1976 to 5,625 in 1985 (table 1 and fig. 1). The number of marketing cooperatives declined from 4,658 to 3,441 and farm supply cooperatives from 2,731 to 2,036. Number of service cooperatives increased from 146 to 148.

Business Size

Measured by annual gross business volume, farmer cooperatives increased in size. Although the majority of cooperatives remain small and primarily serve local areas, a growing number are seeking regional, national, or even international markets as a means of business growth and survival.

The increased size of individual cooperatives comes in part from mergers and consolidations. However, data used were not adjusted for changes in price levels and some size changes are due in part to inflationary effects.

In 1985, 90.6 percent of all farmer cooperatives reported business volumes of less than \$15 million, representing 20.6 percent of the total gross dollar volume (table 2). Only 1.2 percent of farmer cooperatives reported business volumes of \$200 million or more. These cooperatives, however, accounted for 53.6 percent of total sales compared with 45.1 percent in 1976.

The 100 largest cooperatives (usually operating over large geographic areas) make up an important segment of farmer cooperatives. During 1976, the 100 largest cooperatives accounted for about \$31.5 billion, or 56.4 percent of total gross business volume. By 1985, the 100 largest cooperatives 2/ accounted for more than \$49.6 billion in business volume, 58.3 percent of the total. These cooperatives, however, directly and through member cooperatives serve a large proportion of the total memberships.

²/ Based on amount of annual gross sales (includes intercooperative sales) but without regard to size of assets.

^{1/} Preliminary.

Business Volume

Net cooperative business, unadjusted for changes in the price level, increased from \$40.1 billion in 1976 to \$65.6 billion in 1985 (table 3 and fig. 2).

During this period, marketing of farm products declined from 74 to 72 percent of annual net business volume; purchases of production supplies rose slightly from 24 to 25 percent; and related services increased from 2 to 3 percent.

Marketing volume increased from \$29.8 billion to \$47.3 billion, supplies purchased from \$9.4 billion to \$16.6 billion, and services provided from \$855 million to \$1.6 billion.

Four commodity groups accounted for 83 percent of all products marketed in 1976 and 85 percent in 1985. They were dairy; grain, soybeans, and soybean meal and oil; fruits and vegetables; and livestock.

In 1985, dairy and fruits and vegetables showed a moderate increase from 1976 in proportion of total cooperative business. Grain, soybeans, and soybean meal and oil and livestock and showed a decrease. Among lesser commodities, sugar, rice, and poultry declined while cotton showed a slight increase.

In the farm supply group, three items--petroleum, fertilizer, and feed--were especially important. They accounted for 73 percent of the total production supply business in 1976 and increased slightly to 74 percent in 1985.

Considering changes in the production supplies group, the proportion of total business volume accounted for by feed and fertilizer declined, while petroleum showed an increase. Farm chemicals also increased in proportion, while other production supplies decreased slightly.

^{2/} Includes intercooperative volume.

 $[\]overline{2}/$ Adjusted for duplication arising from multiple activities performed by many cooperatives.

^{3/} Charges for services related to marketing or purchasing but not included in the volume reported for these activities.

Business Volume of Farmer Cooperatives

Market Share

Cooperatives accounted for about 23 percent of the agricultural products marketed at the first-handler level in 1973 (figure 3). This share increased to 28 percent in 1985. Market share was largest for dairy in both 1973 and 1985. The lowest proportions were in livestock and poultry. Individual commodities with shares higher than the overall average were dairy; grain, soybeans, and soybean meal and oil; and cotton.

Farmers in 1973 purchased 23 percent of the major farm supplies (fertilizer, petroleum, farm chemicals, feed, and seed) through cooperatives (figure 4). This proportion increased to 26 percent in 1985, due mostly to larger volumes of farm chemicals moving through cooperatives. Fertilizer, petroleum, and farm chemicals were handled in greater proportion than the overall average.

III--1985 STATISTICS

Number of Cooperatives

The 1985 survey accounted for 5,625 marketing, farm supply, and related services 3/ cooperatives, compared with 5,782 in 1984.

The decrease of 157 associations, 2.7 percent fewer, largely reflected a continuing trend involving merger, consolidation, acquisition, or dissolution.

Of the 5,625 cooperatives, 3,441 primarily marketed farm products, 2,036 handled farm production supplies, and 148 provided related services.

Comparison of 1985 to 1984 shows that marketing cooperatives increased from 60.8 to 61.2 percent of the total number of cooperatives; farm supply cooperatives decreased from 36.9 to 36.2 percent; and related service cooperatives increased slightly from 2.3 to 2.6 percent.

The percentage changes in table 1 are due to some extent to the reclassification of cooperatives because of changes in the function from which they derive the major portion of their dollar volume. The primary examples are marketing cooperatives whose major business became the sale of farm supplies, or farm supply cooperatives in which marketing took a dominant role.

In table 4, cooperatives are classified according to the business activity that consistently accounted for the largest percent of their dollar volume for 1985.

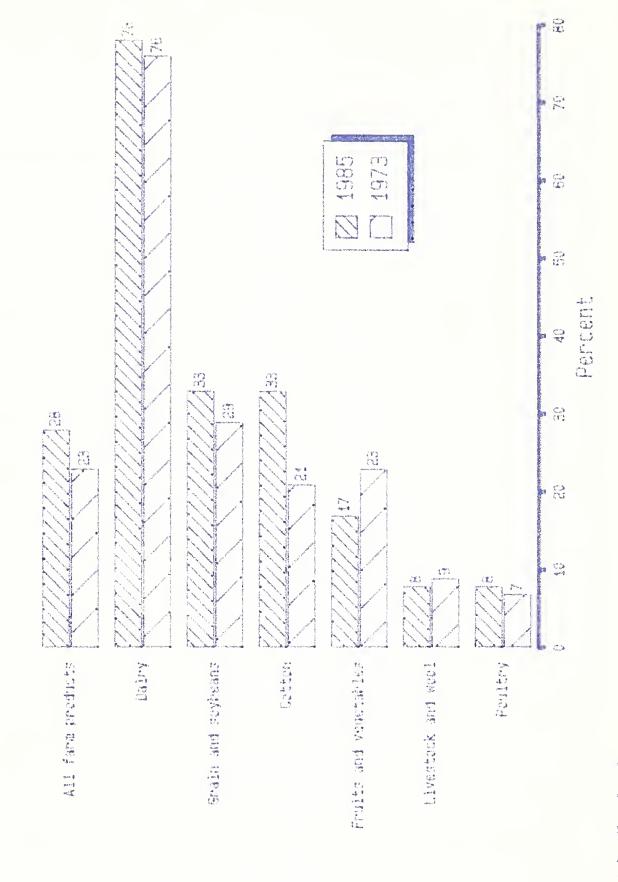

Minnesota had the most cooperatives with 566, North Dakota was second with 391, and Texas followed closely with 387.

Memberships

Memberships in marketing, farm supply, and related service cooperatives totaled 4,781,216 in 1985, a decrease of 1.3 percent from 4,841,749 (table 5 and fig. 5).

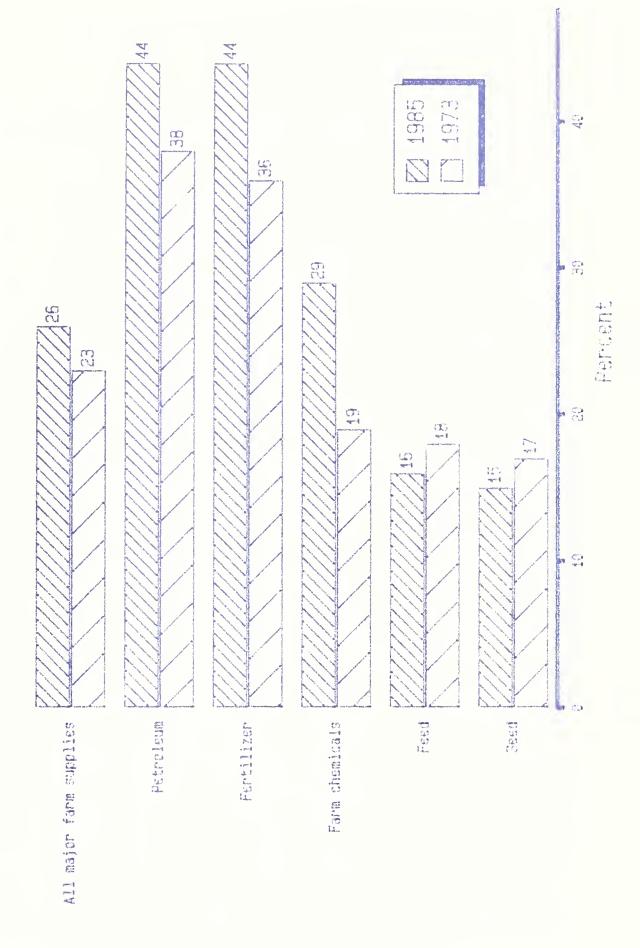

^{3/} Related services include trucking, storage, grinding, drying, artificial insemination, and similar services affecting the form, quality, or location of farm products and supplies handled by cooperatives. They do not include credit, electric, telephone, or other such services not directly related to marketing or purchasing activities.

Footnotes to table 4

- 1/ Includes independent local cooperatives, federations, centralized cooperatives, and cooperatives with mixed organizational structures.
- $\frac{2}{2}$ Data covering operations of cooperatives for calendar year 1985. Figures may vary from previously published data due to estimation procedures for non-respondents and sampling methodology.
- $\overline{3}$ / Cooperatives performing specific services related to a commodity are included. Incorporated local associations of a federation that performs the actual marketing or processing are counted. Livestock shipping associations are also included.
- $\frac{4}{}$ Includes farmer members (those entitled to vote for directors) but does not include nonvoting patrons. (Some duplication in these membership figures occurs because many farmers belong to more than one cooperative.) Totals may not add due to rounding.
- 5/ The cooperative with which this membership is affiliated has been counted in the State in which the cooperative maintains its headquarters. (Foreign members of U.S. headquartered cooperatives are in Canada and Mexico).
- 6/ Includes soybean marketing and processing.
- $\overline{2}$ / Membership of nut cooperatives that market peanuts fluctuates from year to year and is affected by the extent to which producers participate in price stabilization programs.
- $\underline{8}/$ Includes sugar, sugarcane, sugar beets, honey, maple syrup, molasses, and sorghum.
- 9/ Member-patrons. Number fluctuates considerably from year to year due to participation in price stabilization programs.
- 10/ Includes forest products, hay, hops, nursery stock, coffee, and other farm products not separately classified.
- 11/ Cooperatives providing services related to marketing or purchasing activities.
- 12/ No individual farmer memberships.

1/ For years before 1950-51, see appendix table 6, FCS General Report 128 in libraries. 2/ Previously, data for farmer cooperatives were reported on a fiscal year basis. Beginning in 1978, data are included for the calendar year. Data for 1978 are estimated. 3/ Number of memberships were up significantly due to inclusion of additional related service cooperatives.

4/ Preliminary.

Memberships in Farmer Cooperatives

The long-term trend has been one of decline, reflecting, in part, the decreasing number of farmers in the United States. Many farmers were members of more than one cooperative and each membership was counted. Total membership contains duplication that cannot be eliminated with current reporting methods.

Though many farmers maintained membership in more than one cooperative, 914,000 members, or 19.1 percent, did not actively patronize their cooperatives.

Membership figures often vary widely from year to year for cooperatives participating in price stabilization programs, particularly for those handling cotton, peanuts, or tobacco.

Classification of members is affected also by the diversity of services offered by cooperatives. For example, a member may use a cooperative to market only one of the farm products handled by the cooperative, or a member may use a cooperative classified in the marketing group only for purchasing one or more types of production supplies. The member's business with the cooperative, therefore, may not be in the group that represents the cooperative's major business volume (which determines how the cooperative is classified in this report). The membership, however, will be included arbitrarily in that classification.

Minnesota continued to lead in memberships with 423,983 (table 4). Wisconsin was second with 308,491 and Iowa was third with 294,247.

Business Volume

Total gross business volume of 5,625 marketing, farm supply, and related service cooperatives amounted to \$85.1 billion (table 6), a 12.2-percent decrease from \$96.9 billion.

Total net business volume of farmer cooperatives amounted to \$65.6 billion. This amount included \$47.3 billion for farm products marketed, \$16.6 billion for farm supplies purchased, and \$1.6 billion for services performed. The total net figure of \$65.6 billion, which excludes intercooperative business (the difference between gross and net business volumes), represented a decrease of 10.2 percent from \$73 billion in 1984. However, discounting for price changes, real drop in business volume was estimated to be 6.5 percent. 4/ Intercooperative business dropped to \$19.5 billion from \$23.8 billion.

Gross and net volumes of business for marketing, purchasing, and related service activities are shown in table 6 for selected years from fiscal 1951 through calendar 1985. Both gross and net volumes were the lowest since 1979.

Gross volume of farm products marketed by cooperatives decreased from \$67.6 billion to \$57 billion, a drop of 15.7 percent. The net volume of farm products marketed amounted to \$47.3 billion and accounted for 72.1 percent of the total net volume of cooperatives. The net marketing volume represented a decrease of 13.3 percent from \$54.6 billion. The decline resulted primarily from decreases in the dollar volumes reported for grain, soybeans, soybean meal and oil.

 $[\]frac{4}{}$ By deflating the volume of farm products handled by cooperatives in 1985 by indices of producer prices for farm products and processed foods and feeds and the volume of farm supplies and related services by the index on prices paid by farmers for production of all commodities excluding interest, taxes, and wage rates, total business volume amounted to \$68.3 billion, a 6.5-percent decrease from the 1984 volume.

Table 6--Business volume of marketing, farm supply, and related service cooperatives, selected years

 $\overline{1}$ / For years prior to 1950-51, see appendix table 7, FCS General Report 128, in libraries. Data for prior years are not entirely comparable due to revisions in statistical procedures in 1950-51.

4/ Preliminary.

^{2/} Services related to marketing or supply purchasing but not included in the volumes reported \overline{f} or these activities. 3/ Previously, data for farmer cooperatives were reported on a fiscal year basis. Beginning in 1978, data are included for the calendar year. Data for 1978 are estimated.

Figure 6 illustrates the leading products marketed by cooperatives based on net marketing business volume. Dairy led with 33.7 percent of total net marketing volume, followed by grain, soybeans, and soybean meal and oil with 33.1 percent. Fruits and vegetables ranked third with 10.7 percent of total net marketing volume.

Gross volume of all farm supplies handled by cooperatives amounted to \$26.4 billion, a 4.7-percent decrease from \$27.7 billion. The net farm supply volume of \$16.6 billion accounted for 25.4 percent of the total net business volume, a 1.9-percent decrease from \$17 billion. Decreases in net volumes of feed and fertilizer largely accounted for this decline.

As shown in figure 7, leading farm supplies handled by cooperatives in terms of net business volume were petroleum, with 34.9 percent of the total, followed by fertilizer and feed.

Receipts for services performed by all types of cooperatives amounted to \$1.6 billion, a record high-up 7.8 percent. Service receipts represented 2.5 percent of total net business volume.

An estimated 69.8 percent of the 5,625 cooperatives, or 3,925 cooperatives, marketed farm products (table 7). Farm supplies were handled by 4,288 cooperatives, 76.2 percent of the total, while 3,883 cooperatives, or 69 percent of the total, performed one or more services related to farm product marketing and farm supply purchasing.

Volume of farm products marketed and farm supplies purchased by cooperatives is shown by State in table 8.

Balance Sheet

Combined assets for all farmer cooperatives totaled \$27.8 billion in 1985, down 4.8 percent from \$29.2 billion for 1984 (table 9 and figure 8). Assets of cooperatives, eliminating intercooperative investments, were \$24.5 billion compared with \$26.2 billion, a 6.5 percent decrease.

Total liabilities were \$15.7 billion, down 7.5 percent from the \$17 billion reported in 1984. Net worth, or member and patron equity, was \$12.1 billion, down 1.1 percent from \$12.2 billion. The proportion of total assets financed by equity went up from 41.7 to 43.4 percent.

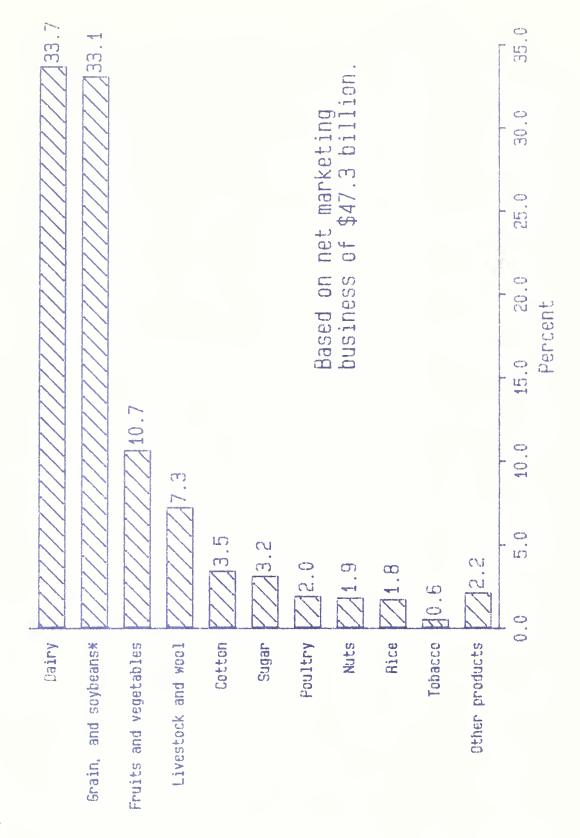

Of the \$27.8 billion in total assets, marketing cooperatives accounted for \$17.8 billion, down 2.5 percent from \$18.3 billion for 1984 (table 10). Cooperatives whose principal products were grain, soybeans, and soybean meal and oil had total assets of nearly \$6.9 billion in 1985 and more than \$7.3 billion in 1984, a 5.4-percent decrease. These cooperatives also maintained the largest proportion of investment in other cooperatives in both 1985 (15.9 percent) and 1984 (14.5 percent).

Assets of marketing cooperatives, excluding investments in other cooperatives, were nearly \$16.1 billion, down from the \$16.7 billion reported in 1984.

Farm supply cooperatives had total assets of more than \$9.7 billion compared with \$10.7 billion in 1984. Excluding intercooperative investments, assets amounted to \$8.2 billion in 1985, down 11.9 percent from the previous year.

Current and term liabilities of marketing cooperatives totaled nearly \$10.4 billion, down from \$10.9 billion. This represented more than half (66.1 percent)

Relative Importance of Major Farm Products Marketed by Cooperatives, 1985

Mincludes soybean meal and oil.

Relative Importance of Major Farm Supplies Handled by Cooperatives, 1985

¹/ Preliminary. Totals may not add due to rounding.

 $[\]frac{2}{}$ Number of cooperatives handling each commodity group is computed as a percentage of the total number of 5,625 cooperatives listed.

^{3/} Less than one-tenth of one percent.

^{4/} Includes coffee, fish, forest products, hay, hops, seed marketed for growers, nursery stock, other farm products not separately classified, and sales of farm products not received directly from member-patrons.

 $[\]frac{5}{}$ Because many cooperatives do more than one type of business, these totals are fewer than the number obtained by adding the number of cooperatives handling individual items or performing individual services.

 $[\]frac{6}{1}$ Includes plant equipment, automotive supplies, hardware, chicks, and other supplies not separately classified.

 $[\]overline{2}$ / Charges for services related to marketing or purchasing but not included in the volume reported for those activities.

Footnotes to table 8

- 1/ Data covering operations of cooperatives whose business years ended during the 1985 calendar year. Includes independent local cooperatives, federations, centralized cooperatives, and cooperatives with mixed organizational structures. The volume of products marketed is allocated to the State in which they originate and the volume of farm supplies is allocated to the State in which they are sold; service volume is allocated to the State or origin when services relate to farm products marketed or to the State of destination when related to farm supplies sold.
- 2/ Gross business volume includes sales between cooperatives. Net business volume excludes sales between cooperatives. Totals may not add due to rounding.
- 3/ Dollar volume is not shown to avoid disclosing operations of individual cooperatives.
- 4/ Includes value of farm products imported, farm supplies exported, services related to imported farm products or exported farm supplies, sales to domestic military installations, or sales of farm products not received directly from member-patrons.
- 5/ Included in dollar volume of California.
- $\overline{6}/$ Includes forest products, hays, hops, nursery stock, coffee, and other farm products not separately classified. Also includes manufactured food products and resale items marketed by cooperatives.
- $\overline{2}$ / Includes automotive supplies, hardware, chicks, and other supplies not separately classified.
- 8/ Receipts for services related to marketing and purchasing activities but not included in the volumes reported for these activities.

Table 9--Selected balance sheet data for farmer cooperatives, 1985

Principal products marketed and major function	Cooperatives $1/$	Total assets	Total liabilities	Net worth
Products marketed:	Number		1,000 dollars	
Cotton Dairy	417 383	4,079,322	491,908 2,520,731	485,809
Grain, soybeans, and soybean meal & oil	343 1,623	3,136,061 6,884,596	2,ZL0,424 3,384,200	3,500,396
Livestock, wool, and poultry Rice Sugar Other products 2/	486 51 38 100	656,463 376,920 912,705 777,873	404,005 216,085 573,227 582,737	252,458 160,835 339,478 195,136
Total farm products	3,441	17,801,677	10,391,318	7,410,359
Total farm supplies	2,036	9,729,244	5,209,272	4,519,972
Total related services	148	247,650	124,749	122,901
Combined total	5,625	27,778,571	15,725,339	12,053,232

1/ Many cooperatives are multiproduct and multifunctional in operations and are classified according to predominant commodity or function indicated by business volume.
2/ Includes dry edible beans and peas, nuts, tobacco, and miscellaneous products.

Assets and Net Worth of Farmer Cooperatives

Rice Sugar	51 38	354,789 910,387	22,131 2,318	3/5,920 912,705	
Other products $\frac{2}{}$	100	767,404	10,469	777,873	1.3
Total farm products	3,441	16,086,117	1,715,560	17,801,677	9.6
Total farm supplies	2,036	8,182,889	1,546,355	9,729,244	15.9
Total related services	148	240,027	7,623	247,650	3.1
Combined total	5,625	24,509,033	3,269,538	27,778,571	11.8

1/ Many cooperatives are multiproduct and multifunctional in operations and are classified according to predominant commodity or function indicated by business volume. 2/ Includes dry edible beans and peas, nuts, tobacco, and miscellaneous products.

of total liabilities for all cooperatives, compared with 64 percent in 1984. Grain marketing cooperatives showed nearly \$3.4 billion, a 9.9-percent decrease. Combined liabilities financed 56.6 percent of total cooperative assets.

Net worth or member and patron equity for all marketing cooperatives totaled more than \$7.4 billion, up slightly (less than 1 percent) from 1984. Marketing cooperatives again maintained more than half the total (61.5 percent), while farm supply cooperatives accounted for 37.5 percent. The highest percent of total assets represented by net worth for all marketing cooperatives (50.8 percent) was for cooperatives primarily marketing grain, soybeans, and soybean meal and oil. The lowest percent (25.1 percent) was for cooperatives primarily marketing other product 5/. Cooperatives classified as farm marketing and farm supply had 41.6 and 46.5 percent, respectively.

Net Margins

Total net margins, less losses, for all cooperatives were more than \$775 million, including intercooperative dividends and refunds (figure 9). Net margins were down 23.1 percent from the previous year's total of \$1.01 billion. Intercooperative dividends of \$210 million were up 13.2 percent from \$185 million. Losses totaled \$273.1 million-up from \$174.4 million in 1984.

Marketing cooperatives' net margins of \$600 million were 10.2 percent below the \$668 million generated in 1984 (table 11). Also, marketing cooperatives' net margins accounted for 77.3 percent of total net margins and 0.7 percent of gross sales volume. Cooperatives whose principal commodity was dairy dropped 5.2 percent from 1984 but maintained the largest percent of marketing cooperatives' net margins (31 percent).

Farm supply cooperatives' net margins (\$150 million) dropped severely from the \$316 million in 1984—a decrease of 52.6 percent. Farm supply cooperatives' percent of total net margins dropped from 31.3 percent to only 19.3 percent in 1985. The largest drop in net margins of farm supply cooperatives came from their own operations—down from \$220.1 million to \$60.6 million. The decline in net margins is mainly due to large losses incurred by some of the larger cooperatives.

Farmer cooperatives' net margins from their operations totaled \$566 million--down 31.3 percent from \$823 million. More than 27 percent, or \$210 million, of total net margins was generated from other cooperatives, up from 18.4 percent. Marketing cooperatives' net margins from other cooperatives increased from 13.3 percent to 19.8 percent of the total. More than 46.4 percent of the net margins generated by grain cooperatives came from other cooperatives.

Other Service Organizations

Other types of service cooperatives or organizations were operating in 1985 besides those directly related to marketing and farm purchasing. Data for these organizations are shown by farm credit district in table 12 and by State in table 13. A map showing States in each district appears as figure 10.

Federal Land Bank Associations

Federal land bank associations totaled 306 with more than \$48.9 billion in outstanding loans throughout the United States and Puerto Rico. The Texas district

^{5/} Includes dry edible beans and peas, nuts, tobacco, and miscellaneous products.

Net Margins of Farmer Cooperatives

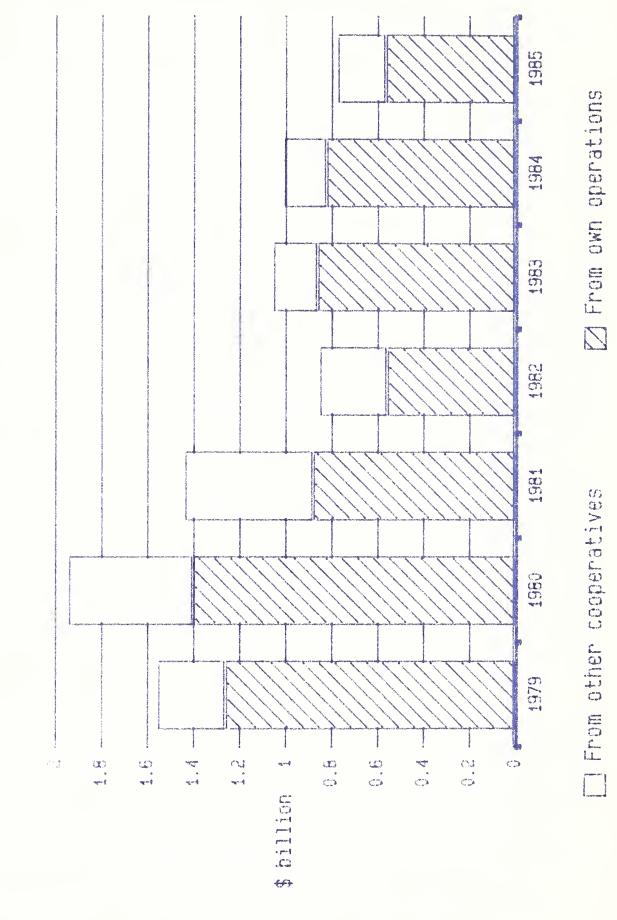

Table 11--Farmer cooperative net margins, 1985 $\underline{1/}$

Principal products marketed and major function	Cooperatives $2/$	Total net margins	Margins from own operations	Margins from other cooperatives
Products marketed:	Number		1,000 dollars	
Cotton	417	110,930	97,803	13,127

For year ended December 31, 1985. Source: Summary Report of Condition and Performance of the Farm Credit System See figure 10. $\frac{1}{2}$

Figure 10

Cooperative Farm Credit Districts

led all farm credit districts with 14.4 percent of the total number of associations and the St. Paul and Wichita districts ranked second with 12.1 percent. Total assets of the federal land bank associations were nearly \$52.2 billion. Net worth was \$3.7 billion, representing almost 7.1 percent of the total assets. The St. Paul district was the leader in outstanding loans (\$7.3 billion) and assets (\$7.4 billion). However, the Columbia district led in net worth with 15.7 percent of the total; the St. Paul district ranked second with 13.7 percent.

Production Credit Associations

Production credit associations, totaling 216, had outstanding loans of nearly \$14.3 billion. Assets totaled \$16.5 billion while net worth, exceeding \$2.8 billion, financed 17.2 percent of the total.

The Sacramento district was the leading PCA in three categories nationally, accounting for 19 percent of total outstanding loans, 17.9 percent of total assets, and 14.8 percent of total net worth.

Banks for Cooperatives

Thirteen banks for cooperatives had outstanding loans of \$4.2\$ billion. Total assets were \$5.6\$ billion and net worth totaled \$1.1\$ billion. The proportion of total assets financed by equity was 20.4 percent.

The St. Paul district led all farm credit districts with 23.5 percent of the outstanding loans, 23.4 percent of the total assets, and 21.3 percent of member equity.

Rural Credit Unions

Rural credit unions numbered 915 with 2,811,256 members holding share savings of nearly \$6 billion.

Wisconsin led all States in number of associations with 9.9 percent of total, while California led in number of members, with 21.6 percent of the total, and in share savings with 25.6 percent of the total.

Rural Electric Cooperatives

Rural electric cooperatives, totaling 927, reported nearly 10.2 million consumer members and revenue of more than \$18.8 billion.

Texas again led all States, with 8.6 percent of total associations, 9.7 percent of total consumer memberships, and 7.8 percent of total revenue.

Rural Telephone Cooperatives

Rural telephone cooperatives borrowing from the Rural Electrification Administration (REA), totaled 249, with revenues of more than \$604\$ million and 1,043,773 subscriber members.

Iowa had the largest number of cooperatives (13.3 percent of the total), while Texas accounted for more subscriber memberships (9.1 percent) and revenue (13 percent) than any other State.

Dairy Herd Improvement Associations

Dairy herd improvement memberships numbered 37,457 and cows tested totaled nearly 3.3 million.

New York (2,746), Pennsylvania (3,820), Minnesota (4,632), and Wisconsin (6,029) combined accounted for 46 percent of total members. Nearly 548,000, or 16.7 percent, of the cows tested were in California.

Agricultural Cooperative Service U.S. Department of Agriculture Washington, D.C. 20050

Agricultural Cooperative Service (ACS) provides research, management, and educational assistance to cooperatives to strengthen the economic position of farmers and other rural residents. It works directly with cooperative leaders and Federal and State agencies to improve organization, leadership, and operation of cooperatives and to give guidance to further development.

The agency (1) helps farmers and other rural residents develop cooperatives to obtain supplies and services at lower cost and to get better prices for products they sell; (2) advises rural residents on developing existing resources through cooperative action to enhance rural living; (3) helps cooperatives improve services and operating efficiency; (4) informs members, directors, employees, and the public on how cooperatives work and benefit their members and their communities; and (5) encourages international cooperative programs.

ACS publishes research and educational materials and issues <u>Farmer Cooperatives</u> magazine. All programs and activities are conducted on a nondiscriminatory basis, without regard to race, age, creed, color, sex, handicap, or national origin.
